PREFACE

This report is part of the Volume Series of the 1966 Census of Canada and presents final results of the Census of Agriculture as of June 1, 1966.

The Introduction includes definition of terms used in Census of Agriculture reports, and contains a section on the Agriculture Quality Check. The tabular material contains historical tables of comparable data for previous censuses, and a series of tables that provide current data for counties or census divisions and subdivisions. A number of tables report data cross-classified by such factors as size, tenure, economic class, part-time work and type of farm.

Copies of the two questionnaires used in the 1966 Census of Agriculture and an Index to the tables are found in the Appendices.

Material for this report was prepared in the Census of Agriculture Subdivision of the Census Division.

WALTER E. DUFFETT,
Dominion Statistician.

Ottawa, February 1968.

PRÉFACE

Le présent rapport fait partie de la Série des volumes du recensement du Canada de 1966. Il présente les résultats définitifs du recensement de l'agriculture, le 1er juin 1966.

L'introduction comprend la définition des termes employés dans les rapports du recensement de l'agriculture, et une section sur le contrôle qualitatif du recensement de l'agriculture. La matière tabulaire contient des tableaux chronologiques de données comparatives des recensements antérieurs, et une série de tableaux contenant les données actuelles pour les comtés et les divisions et subdivisions de recensement. Un certain nombre de tableaux présentent des chiffres recoupés par des facteurs tels que la grandeur, le mode d'occupation, la catégorie économique, le travail à temps partiel et le genre de ferme.

Les appendices reproduisent les deux questionnaires employés au recensement de l'agriculture de 1966. On y trouve aussi un index des tableaux.

La matière du présent rapport a été établie à la Subdivision du recensement de l'agriculture de la Division du recensement.

WALTER E. DUFFETT,
Statisticien fédéral.

Ottawa, février 1968.

INTRODUCTION

Final results of the 1966 Census of Agriculture are presented in this report. It is a part of a series of ten Provincial reports and a Summary report for Canada which when assembled make three volumes of the Volume Series of the 1966 Census of Canada.

Volume III comprises the Summary for Canada and the reports for the provinces of Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick. Volume IV includes the reports for the provinces of Quebec and Ontario. Volume V contains the reports for the four western provinces of Manitoba, Saskatchewan, Alberta and British Columbia.

A detailed account of Census of Agriculture methodology will be found in the Administration Report (Catalogue No. 99-604), which is one of the Special Series of census reports.

Year to which census figures apply.—The 1966 Census of Agriculture was taken as of June 1, 1966. Statistics for agricultural holdings,—operators, areas, livestock and poultry numbers, machinery and equipment and electric power relate to June 1, 1966. Crop areas refer to the land sown on June 1, 1966 or to be sown for harvest in 1966. The information on part-time work, agricultural expenditures and sales of agricultural expenditures and sales of agricultural products and forest products refer to the 12-month period prior to the census. The statistics in Table 26 on the amount of milk sold relate to the month of May 1966. The number of hired agricultural workers were reported for the week ending May 28, 1966.

Explanation of Terms

An understanding of the terms which are explained below will permit a more meaningful use of the statistics provided by the Census of Agriculture. Particularly an understanding of the terms "census-farm" and "commercial farm" is desired, as these are the two principal categories for which data are presented.

Historically, the Census of Agriculture has endeavoured to provide statistics of all producers of agricultural products. These statistics have been presented for all agricultural holdings referred to as "census-farms". Many of the "census-farms" are small holdings which have been and are rural residences, holdings of semi-retired people and of part-time operators who hold full-time or part-time jobs outside of farming. A substantial proportion of these small scale holdings would not be regarded as "farms" by many users of statistics since the operators do not rely on their holdings for a major part of their income.

Recent Censuses of Agriculture have presented data for a category of "census-farms" referred to as "commercial farms". This categorization has enabled statistics to be presented for a group of holdings that are considered as more "typical" farms since the small scale holdings are not included. It will be noted below, that the minimum agricultural sales requirements for a "commercial farm" was raised to \$2,500 for the 1966 Census.

A separate questionnaire, Form 7, was used to obtain agricultural information for holdings on which there was some agricultural activity, but because the holdings were less than one acre in size or because the agricultural production was too limited, they did not qualify as census-farms. The number of these non-census-farm holdings, the area and the numbers of livestock and poultry on these holdings are reported in Table 12. These data are not included in subsequent tables.

Census-farms.—This term is defined in the 1966 Census as an agricultural holding of one acre or more with sales of agricultural products, during the 12-month period prior to the census, of \$50 or more.

Le présent rapport donne les résultats définitifs du recensement de l'agriculture de 1966. Il fait partie d'une série de dix rapports provinciaux et d'un rapport récapitulatif de tout le Canada qui, lorsque rassemblés, forment trois volumes de la Série des volumes du recensement du Canada de 1966.

Le volume III comprend le rapport récapitulatif de tout le Canada et les rapports pour les provinces de Terre-Neuve, Île-du-Prince-Édouard, Nouvelle-Écosse et Nouveau-Brunswick. Dans le volume IV sont inclus les rapports pour les provinces de Québec et de l'Ontario. Le volume V contient les rapports pour les quatre provinces de l'Ouest, soit Manitoba, Saskatchewan, Alberta et Colombie-Britannique.

On trouvera une description détaillée de la méthodologie du recensement de l'agriculture dans le Rapport administratif (numéro de catalogue 99-604) qui est l'un de la Série spéciale de rapports sur le recensement.

Année à laquelle ont trait les chiffres du recensement.—Le recensement de l'agriculture de 1966 se rapporte au 1er juin 1966. La statistique des exploitations agricoles,—exploitants, superficies, nombre de bétail et volaille, machines et outillage et énergie électrique, porte sur le 1er juin 1966. La superficie des cultures se rapporte à la terre ensemencée le 1er juin 1966 ou devant être ensemencée pour la récolte de 1966. Les renseignements sur le travail à temps partiel, les dépenses agricoles, les ventes de produits agricoles et de produits forestiers ont trait aux douze mois précédant le recensement. Les statistiques du tableau 26, sur la quantité de lait vendue se rapportent au mois de mai 1966. Le nombre de travailleurs agricoles engagés est déclaré pour la semaine terminée le 28 mai 1966.

Explication des termes

Une compréhension des termes expliqués ci-dessous permettra un meilleur usage de la statistique présentée par le recensement de l'agriculture. Particulièrement une compréhension des termes "fermes de recensement" et "fermes commerciales" est souhaitable car elles sont les deux principales catégories pour lesquelles les données sont présentées.

Par le passé, le recensement de l'agriculture s'efforçait de fournir la statistique de tous les producteurs de produits agricoles. Ces statistiques ont été présentées pour toutes les exploitations agricoles qui sont dénommées "fermes de recensement". Plusieurs "fermes de recensement" sont de petites exploitations qui ont été et qui sont encore des domiciles ruraux, des exploitations de personnes pratiquement à la retraite et d'exploitants à temps partiel qui travaillent à plein temps ou à temps partiel hors de l'exploitation. Une proportion importante de ces exploitations de petite envergure ne seraient pas considérées comme "fermes" par plusieurs usagers de statistiques, étant donné que les exploitants ne dépendent pas de leurs exploitations pour la majeure partie de leur revenu.

Dans les recensements agricoles récents on a présenté des données pour une catégorie de "fermes de recensement" appelées "fermes commerciales". Ce classement par catégories a rendu possible la présentation de statistiques pour un groupe d'exploitations considérées comme ferme "typique", les petites fermes n'étant pas incluses. Il sera noté plus bas que le minimum de ventes agricoles requis pour une "ferme commerciale" a été augmenté à \$2,500 pour le recensement de 1966.

Un autre questionnaire (Formule 7) a servi à obtenir des renseignements sur les exploitations où se faisait quelque travail agricole, mais, comme ces exploitations étaient de moins d'un acre et leur production trop limitée, elles n'ont pas été considérées comme "fermes de recensement". Le nombre de ces exploitations non agricoles, la superficie et le nombre de bétail et de volaille dans ces exploitations sont déclarés au tableau 12. Ces données ne sont pas comprises aux tableaux subséquents.

Fermes de recensement.—Ce terme se définit pour le recensement de 1966 comme une exploitation agricole d'un acre ou plus avec des ventes de produits agricoles de \$50 ou plus au cours des douze mois précédant le recensement.

The holding may consist of a single tract of land or a number of separate tracts held under the same or different tenures and operated as a single unit. Where the census-farm was made up of several parts located in different municipalities, the 1966 Census reported the complete holding as one unit in the municipality where the headquarters was located.

The 1966 definition of the census-farm is the same as in 1961. A change in definition occurred in the 1961 Census from the definition used in the 1956 and 1951 Censuses. The effect of this change in definition was discussed in detail in the 1961 Census, Volume V.

Commercial farms. — These holdings are defined in the 1966 Census as census-farms with values of sales of agricultural products, during the 12-month period prior to the census, of \$2,500 or more (excluding "institutional farms, etc."). Thus, a commercial farm is an agricultural holding of one or more acres with a value of sales of agricultural products, in the 12 months prior to the census, of \$2,500 or more (excluding "institutional farms, etc.").

The 1961 Census defined a commercial farm as a census-farm with sales of agricultural products, during the past twelve months, of \$1,200 or more (excluding "institutional farms, etc."). Adjustments were made for this report in the earlier statistics so the data presented for commercial farms of 1961 and 1951 are based upon the 1966 commercial farm definition of \$2,500 or more in sales of agricultural products. The number and area of commercial farms reported here for 1961 and 1951 will therefore be less than that reported in the 1961 Census publications.

It should be noted that variations in agricultural production and prices of agricultural products affect the number of commercial farms. Between 1960 and 1965 the farm index of prices of agricultural products for Canada increased from 250.0 to 282.1.

Operator. — This term is used in the Census of Agriculture to designate the person who is directly responsible for the agricultural operation of the holding, whether as owner, tenant or hired manager. As only one operator is listed for each census-farm, the number of operators is the same as the number of census-farms. If, for example, the holding was operated as a partnership, only one partner was considered to be the operator.

Tenure of operator. — Agricultural holdings are classified by tenure depending on whether the operator owns, rents or manages the census-farm. A fully owned holding means the operator holds the title or deed to all the land he operates, or has a purchase agreement for same. It does not necessarily mean that the property is free of debt. The term "partly owned-partly rented" refers to instances where the operator owns only part of the land he operates and rents or leases the remainder. When the operator manages the whole census-farm for someone else, it is classed as managed.

If the holding is only partly managed, then for tenure purposes, the managed portion is considered to be owned. For example, a census-farm, which is partly managed and partly rented, is classed as partly owned-partly rented.

Leased land is included with rented land.

Population on census-farms. — All persons living in a dwelling situated on a census-farm as defined in the census were considered to be farm population, regardless of their occupation. In the case of institutions located on a census-farm, only the manager, hired agricultural workers and members of their households were included with this population. Prior to the 1951 Census, the farm population as reported in the Census of Agriculture was tabulated from a question appearing on the General Farm Schedule. In the 1951, 1956, 1961 and 1966 Censuses the question appeared only on the Population Document. Nevertheless, the term "population on census-farms"

L'exploitation peut se composer d'un seul lopin ou d'un certain nombre de lopins distincts selon un même ou différents modes d'occupation et doit être exploitée comme unité distincte. Lorsque la ferme de recensement se composait de diverses parties situées dans des municipalités différentes, le recensement de 1966 dénombrerait l'exploitation entière dans la municipalité où se trouvait la maison de l'exploitant (siège de la ferme).

La définition de 1966 pour une "ferme de recensement" est la même que celle employée en 1961. Cependant il y avait une variation entre la définition qui a servi aux recensements de 1956 et 1951 et celle du recensement de 1961. Le résultat du changement apporté à la définition était discuté en détail dans le volume V du recensement de 1961.

Fermes commerciales. — Ces exploitations sont définies au recensement de 1966 comme "fermes de recensement" avec ventes de produits agricoles de \$2,500 ou plus, au cours des douze mois précédant le recensement (à l'exclusion de "fermes d'institution, etc."). Ainsi, une ferme commerciale est une exploitation agricole d'une acre ou plus avec ventes de produits agricoles de \$2,500 ou plus au cours des douze mois précédant le recensement (à l'exclusion de "fermes d'institution, etc.").

Au recensement de 1961 une "ferme commerciale" était définie comme étant une "ferme de recensement" avec ventes de produits agricoles de \$1,200 ou plus au cours des douze derniers mois (à l'exclusion de "fermes d'institution, etc."). Dans le présent rapport, les ajustements qui ont été faits sur les statistiques précédentes, concernant les données sur les fermes commerciales de 1961 et 1951, sont basés sur la définition de 1966 d'une ferme commerciale "de \$2,500 ou plus de ventes de produits agricoles". Le nombre et la superficie des fermes commerciales publiés ici pour 1961 et 1951 seront, par conséquent, inférieurs à ceux publiés au recensement de 1961.

Il est à noter que les variations de la production agricole et le prix des produits agricoles influent sur le nombre de "fermes commerciales". Entre 1960 et 1965 l'indice agricole des prix des produits agricoles pour le Canada a augmenté de 250.0 à 282.1.

Exploitant. — Aux termes du recensement de l'agriculture cette expression désigne la personne directement responsable des travaux agricoles de l'exploitation, soit à titre de propriétaire, de locataire ou de gérant. Étant donné qu'un seul exploitant est attribué à chaque ferme de recensement, le nombre d'exploitants est le même que le nombre de fermes de recensement. Si, par exemple, l'exploitation est exploitée en société, un seul des associés est considéré comme exploitant.

Mode d'occupation. — Les exploitations agricoles sont classées suivant le mode d'occupation, selon que l'exploitant possède, loue ou gère la ferme de recensement. Une exploitation à propriété entière signifie que l'exploitant détient le titre ou l'acte de toute la terre qu'il exploite ou qu'il possède une convention d'achat à ce sujet. Il ne s'ensuit pas nécessairement que la propriété soit libre de toute dette. Les expressions "partiellement possédée" et "partiellement louée" s'appliquent à l'exploitant qui possède une partie seulement de la terre qu'il exploite, et loue le reste à bail ou autrement. Lorsqu'il gère toute la ferme de recensement pour une autre personne, elle est classée comme gérée.

Si l'exploitation n'est que partiellement gérée, la partie gérée est considérée comme possédée, aux fins du mode d'occupation. Par exemple, une ferme de recensement partiellement gérée et partiellement louée est classée comme partiellement possédée-partiellement louée.

La terre louée à bail est incluse dans la terre louée.

Population dans les fermes de recensement. — Toutes les personnes demeurant dans un logement situé dans une ferme de recensement constituent la population agricole, quelle que soit leur profession. Dans le cas des institutions situées dans une ferme de recensement, seuls le gérant, les travailleurs agricoles engagés et les membres de leur ménage sont comptés parmi la population agricole. Jusqu'au recensement de 1951, la population agricole établie par les recensements de l'agriculture était calculée d'après une question du Questionnaire agricole général. Aux recensements de 1951, 1956, 1961 et 1966, la question n'a paru que dans le Document-population. Toutefois, la "population"

has the same definition in all censuses. The population figures given in Tables 2, 14 and 27 include both urban and rural census-farm population. Persons living on census-farms that were located in cities, towns and villages were included with the census-farm population of the adjoining subdivisions.

Census-farm areas.—The area of agricultural land reported for each municipality subdivision represents the area of land operated by farmers whose headquarters are in the municipality. The area of census-farms reported in Table 27 for the municipal units may, therefore, be greater or less than the actual census-farm area within the municipal boundaries. For larger subdivisions of the provinces, such as census divisions or counties, the discrepancy between reported area of census-farms and actual census-farm area will be less significant.

Crown lands, usually pasture land, which were operated under a lease arrangement with Federal, Provincial or Municipal governments are reported as part of the farming operation of the person to whom the land was leased. However, land which was used under a per head grazing permit or fee is not included.

Large areas of timber land or other non-agricultural land held by a census-farm operator, but operated apart from the farm business, are excluded.

Use of land.—All census-farm land is classified according to use, with each acre included in only one of the categories:

(1) **Improved land.**—The area of improved land consists of the total of the areas reported for the four land categories listed below, namely, area under crops, improved pasture, summer fallow, and other improved land.

(2) **Area under crops.**—Included in this item is the total area of cropland sown or to be sown for harvest in 1966. It is the total area of all field crops (Table 17), and fruits, vegetables, nursery and greenhouse products (Table 19). Because some crops are reported in fractions of an acre there may be slight differences between the sum of the individual crop acreages and the total cropland. Where intercropping or double cropping is practised, the land area was to be reported only once in the category "area under crops", but the areas of each crop were included with the individual crop acreages.

(3) **Improved pasture.**—All land which has been cultivated and seeded to pasture and was used for grazing is included in this item. Enumerators were instructed not to include natural prairie or hay land that was pastured after the crop had been removed.

(4) **Summer fallow.**—The enumerator was instructed to include in this item land from which no crop was to be harvested during 1966, but which was to be cultivated or worked during the year for weed control and/or for moisture conservation. Areas which were sown to a crop with the intention of ploughing the crop under as green manure were enumerated as summer fallow, but land ploughed or cultivated in the summer after a crop (such as hay or fall rye) had been harvested, was to be enumerated as cropland.

(5) **Other improved land.**—This item includes the area of barnyards, home gardens, lanes and roads on census-farms. It also includes areas of cultivated land that were lying idle, being neither summer-fallowed nor cropped, and areas of new breaking that had not been seeded to a crop. Acreages from which sod is being sold for lawn sodding purposes are also included in this item.

(6) **Woodland.**—This includes census-farm woodlots, land leased for cutting, sugar bush and cutover land with young growth which has or will have value as timber, fuelwood or Christmas trees. The area of trees planted for windbreaks was also to be included. It excludes large timber tracts which are run as a separate business from the census-farm. There is

dans les fermes de recensement a gardé la même définition dans tous les recensements. Les chiffres de la population des tableaux 2, 14 et 27 comprennent la population agricole urbaine et rurale des fermes de recensement. Les personnes demeurant dans les fermes de recensement situées dans les cités, villes ou villages font partie de la population dans les fermes de recensement des subdivisions voisines.

Superficie des fermes de recensement.—La superficie de la terre agricole déclarée dans chaque subdivision municipale représente la superficie de terre exploitée par des cultivateurs dont la résidence est dans la municipalité. La superficie des fermes de recensement des subdivisions municipales indiquée au tableau 27 peut donc être supérieure ou inférieure à la superficie réelle des fermes de recensement comprises dans les limites de la municipalité. Dans le cas des grandes subdivisions des provinces, comme les divisions de recensement ou les comtés, l'écart entre la superficie déclarée et la superficie réelle des fermes de recensement dans une subdivision sera moins appréciable.

Les terres de la Couronne, habituellement des pâturages, qui sont exploitées à bail en vertu d'accords avec les gouvernements fédéral, provinciaux ou municipaux, font partie de l'exploitation agricole de la personne à qui la terre a été louée à bail. Toutefois, la terre utilisée en vertu d'un permis de pâturage ou d'un droit par tête n'est pas incluse.

Les grandes étendues de terres boisées ou autres terres non agricoles détenues par un exploitant de ferme de recensement mais exploitées distinctement de la ferme, ne sont pas incluses.

Utilisation de la terre.—Toute terre agricole dans les fermes de recensement est classée suivant son utilisation, chaque acre n'étant incluse que dans une des catégories suivantes:

(1) **Terre défrichée.**—La superficie de la terre défrichée comprend les superficies totales indiquées aux quatre catégories de terre suivantes: terre en culture, pâturages défrichés, jachères et autres terres défrichées.

(2) **Terre en culture.**—On entend par là la superficie totale de la terre ensemencée ou devant l'être en vue d'une récolte en 1966. C'est la superficie totale de toutes les grandes cultures (tableau 17) et des cultures de fruits, de légumes, de produits de serre et de pépinière (tableau 19). Comme certaines cultures sont déclarées en fractions d'acre, la somme des superficies consacrées à chaque culture peut différer de celle de toute la terre en culture. Là où se pratiquent des cultures entre-plantées ou successives la superficie de la terre ne devait figurer qu'une fois dans la catégorie "terre en culture", mais la superficie de chaque culture particulière a été incluse.

(3) **Pâturages défrichés.**—Ils comprennent toute la terre qui a été cultivée et ensemencée en pâturage et qui sert de pacage. Les agents recenseurs avaient été avertis de ne pas inclure les prairies naturelles et les terres à foin devant servir de pacage après la récolte.

(4) **Jachères.**—L'agent recenseur devait indiquer à cet article la terre qui ne serait pas moissonnée en 1966 mais qui devait être cultivée ou travaillée durant l'année pour régulariser ou conserver l'humidité. Les grandes étendues ensemencées avec l'intention de les retourner comme engrais vert étaient classées comme jachères, mais la terre labourée ou cultivée durant l'été (après une récolte de foin ou de seigle d'automne) devait être déclarée comme terre en culture.

(5) **Autre terre défrichée.**—Elle comprend la superficie des basses-cours, des jardins potagers et des ruelles et chemins de ferme de recensement. Elle comprend aussi les superficies de terre cultivée mais inexploitées, n'étant ni en jachère ni en culture, et les nouveaux labours qui n'avaient pas encore été mis en culture. Les superficies dont le gazon est vendu pour le gazonnage des parterres sont aussi comprises dans cet article.

(6) **Terre à bois.**—La terre à bois comprend les boisés de ferme de recensement, la terre affermée pour la coupe du bois, les érablières recouvertes de jeunes pousses qui ont ou auront une valeur de bois-d'oeuvre et de bois de chauffage et comme arbres de Noël. Elle comprend aussi la superficie d'arbres plantés comme brise-vent mais ne comprend pas les grandes étendues

some evidence that changes in the area of this item between censuses may be due to differences in interpretation. This would be particularly true in areas of brushland.

(7) Other unimproved land. — Areas of natural pasture or hay land that had not been cultivated, brush pasture, grazing or waste land, sloughs, marsh and rocky land, etc., are all included in this item.

Crops. — The area of crops in 1966 represents the areas planted or to be planted for harvest in 1966, as reported to the enumerator at the time of enumeration. Actual harvested acreages may vary from the census report due to changes in planting intentions or crop failure which occurred after the date of enumeration. In the case of hay land, where two or more cuttings of hay are taken, the acreage was to be reported only once.

The area of vegetables and cultivated small fruits was to be reported only when these products were being grown mainly for sale, and in the case of tree fruits, only when there were 25 or more fruit trees on the census-farm.

Fruit trees which were definitely abandoned and worthless were not to be included when reporting the number of trees on the census-farm.

The area of greenhouses and nursery products were to be reported only when grown mainly for sale.

Livestock. — Livestock are reported on the census-farm where located, regardless of ownership, except for livestock kept on community pastures. In this case, livestock are related to the holding of the operator owning them rather than to the community pasture.

When reporting the number of cows and heifers kept mainly for milking purposes, the enumerators were instructed to include "heifers, 1 year and under 2 years, being raised mainly for milk production", and "cows and heifers, 2 years and over, milking or to be milked" regardless of whether or not they were of dairy breeding.

Sales of whole milk. — The quantity of milk and cream sold from the census-farm during the month of May 1966 was reported. The enumerators reported whole milk sold through such commercial channels as milk plants, factories and creameries in gallons or pounds of milk. Cream sold through such commercial channels was reported in gallons of cream or pounds of butterfat. In Table 26, where these data are presented, the gallons of milk sold have been converted to pounds of milk. The gallons of cream and pounds of butterfat were converted to pounds of cream for the tabulations. In the case of milk and cream sold directly to consumers, the quantity of cream was reported in quarts of milk equivalents by the enumerators.

Capital values. — This is the value of census-farm capital: land and buildings, machinery and equipment (including automobiles), livestock and poultry. Census-farm operators were asked to give a value for land and buildings, farm machinery and equipment on their holding regardless of tenure. The value reported was to be an estimate of the market value, not the original, replacement or assessed value.

The value of land and buildings was to be the value of the property when being used for agricultural purposes. For areas surrounding cities or towns, the real estate value (for subdivision, industrial, or other non-agricultural purposes) of the census-farm property was **not** to be reported.

The value to be reported for farm machinery was the present market value—that is, the amount for which the machinery and equipment would sell if there was a willing buyer and a willing seller, and not a forced sale. It might be explained as the price the machine would likely bring, in its

boisées qui sont exploitées distinctement de la ferme de recensement. Il y a lieu de croire que les changements de superficie de cette terre d'un recensement à l'autre tiennent à des différences d'interprétation. Tel serait particulièrement le cas dans les régions de terre en broussailles.

7) Autre terre non défrichée. — Cette rubrique comprend les superficies de pâturages naturels ou de terre à foin qui n'ont pas été cultivées, les pâturages de brousse, les terres à pacage ou incultes, les fondrières, les marais et les terrains rocailleux.

Cultures. — La superficie des cultures en 1966 représente les superficies ensemencées ou à ensemencer en vue de la récolte de 1966, d'après les renseignements obtenus par l'agent recenseur lors du dénombrement. La superficie réelle des cultures peut différer de celle du recensement en raison de modifications apportées aux projets ou de pertes de récolte survenues après la date du dénombrement. Dans le cas de la terre à foin qui a donné deux récoltes ou plus, la superficie ne devait être inscrite qu'une fois.

La superficie en légumes et petits fruits cultivés ne devait être déclarée que lorsque ces produits étaient cultivés surtout pour la vente et, dans le cas des fruits de verger, que si la ferme de recensement comprenait 25 arbres fruitiers ou plus.

Les arbres fruitiers définitivement abandonnés et sans valeur ne devaient pas être inclus dans le nombre d'arbres de la ferme de recensement.

La superficie des serres et des pépinières ne devait être inscrite que si les produits étaient cultivés principalement pour la vente.

Animaux. — Les animaux, sauf ceux qui sont mis dans des pâturages en commun, sont attribués à la ferme de recensement où ils se trouvent, quel qu'en soit le propriétaire. S'ils sont dans des pâturages en commun, ils sont attribués à l'exploitation à laquelle ils appartiennent plutôt qu'au pâturage en commun.

Pour indiquer le nombre de vaches et de génisses gardées surtout pour la traite, les agents recenseurs devaient inclure les "génisses de 1 an et de moins de 2, élevées principalement pour la production laitière" et les "vaches et génisses de 2 ans et plus, en lactation ou à traire" élevées ou non pour la production laitière.

Ventes de lait entier. — La quantité de lait et crème vendue dans les fermes de recensement a été déclarée pour le mois de mai 1966. Les agents recenseurs ont déclaré le nombre de gallons et de livres de lait entier vendu dans le commerce, tel que laiteries, fabriques et beurries. La crème vendue dans ces commerces a été déclarée en gallons de crème ou livres de gras de beurre. Pour les données présentées au tableau 26, les gallons de lait vendu ont été convertis en livres de lait. Les gallons de crème et de livres de gras de beurre ont été convertis en livres de crème pour la compilation. Dans le cas du lait et de la crème vendus directement aux consommateurs, la quantité de crème a été déclarée en équivalent de pintes de lait par l'agent recenseur.

Biens capitaux. — Il s'agit de la valeur du capital des fermes de recensement: terre et bâtiments, machines et outillage (y compris automobiles), bétail et volaille. Les exploitants de fermes de recensement devaient déclarer la valeur de la terre et des bâtiments, des machines et de l'outillage agricoles dans leurs exploitations sans tenir compte du mode d'occupation de celles-ci. La valeur déclarée devait être l'estimation de la valeur marchande et non de la valeur initiale, de remplacement ou cotée.

La valeur de la terre et des bâtiments devait être la valeur de la propriété servant à des fins agricoles. Dans les régions avoisinantes des cités ou des villes, la valeur immobilière (aux fins de subdivision, d'industrie ou autres dispositions non agricoles) de la ferme de recensement **ne devait pas** être déclarée.

La valeur à inscrire pour les machines agricoles est la valeur marchande actuelle, soit le montant auquel seraient vendus les machines et l'outillage à un acheteur consentant par un vendeur consentant et non dans une vente forcée. On peut l'expliquer comme étant le prix que la machine serait payée, dans son état

present condition, at an auction sale or the amount the operator would be willing to pay for the machine if he was buying one of the same make, age and condition. The original value or replacement value was not to be reported unless it conformed with the market value.

The total value of machinery and equipment includes the value of items not reported separately as well as the value of the machines which are reported separately.

Values for the livestock and poultry reported in the census were compiled from data on average farm values for the various types of livestock and poultry obtained by the Agriculture Division of the Dominion Bureau of Statistics in a special Sample Survey.

Machinery and equipment.—The number and value was to be reported for agricultural machines on the holding at the census date, regardless of whether the machines were owned by the operator or someone else. Old machines no longer being used were not to be reported. Equipment owned in partnership was to be reported on the census-farm where it was located.

Agricultural workers.—Numbers of hired agricultural workers 15 years of age and over were collected separately for male and female paid workers employed during the week ending May 28, 1966.

Any person doing agricultural work on the census-farm for wages, salary, commission or on a piece rate or labour contract basis, was reported as paid labour. This included paid managers and members of the operator's family receiving regular or specified cash wages.

Agricultural labour done by the operator was not included unless the operator was a paid farm manager. In the case of partly managed census-farms, the operator was considered as paid labour if he worked 20 hours or more on the managed portion.

Housework was not included as agricultural labour.

Part-time operator.—The 1966 Census contained two questions relating to work not connected with the operations of the census-farm:

(a) Was the income the operator received from non-agricultural and agricultural work off his holding, during the 12-month period prior to June 1, 1966, under \$750 or more?

(b) How many days did the operator work off his holding at agricultural and non-agricultural work during the 12-month period prior to June 1, 1966?

If the answer to the first question indicated that the operator received income of \$750 or more from work off his holding, he was classed as a part-time operator. Census-farm operators that received less than \$750 from off-holding work but who worked 75 or more days off the holding were also classed as part-time operators.

In determining the off-holding income, salaries, wages and commissions, as well as net income from custom work, non-agricultural business or professional practice were included. Not included was income from pensions, family allowances, investments, rentals from lands, unemployment insurance or exchange work.

Only the income received by the operator for work performed by him was considered in determining whether he was a part-time operator or not. No consideration was given to incomes received by other members of the operator's household.

Data for census-farms operated by part-time operators, as defined above, are given in Table 37.

Part-time work.—As was noted above, the census-farm operator was asked the number of days he worked off his holding at agricultural or non-agricultural work. Non-agricultural work included fishing, trapping, lumbering, mining, road-work, carpentry work, trucking, construction work, factory or clerical

actuel, dans une vente à l'enchère, ou le montant que l'exploitant serait disposé à payer pour la machine s'il en achetait une de la même marque, du même âge et en pareil état. La valeur initiale ou de remplacement ne devait pas être déclarée sauf si elle correspondait à la valeur marchande.

La valeur totale des machines et de l'outillage comprend la valeur des articles non déclarés séparément aussi bien que celle des machines déclarées séparément.

La valeur déclarée du bétail et de la volaille au recensement est calculée d'après les données sur la valeur moyenne à la ferme des divers types de bétail et de volaille tirée d'une enquête fragmentaire spéciale de la Division de l'agriculture du Bureau fédéral de la statistique.

Machines et outillage.—Il fallait inscrire le nombre et la valeur des machines agricoles dans l'exploitation à la date du recensement, que les machines aient appartenu à l'exploitant ou à toute autre personne. Les vieilles machines inutilisables ne devaient pas être déclarées. L'outillage possédé conjointement devait être déclaré à la ferme où il se trouvait.

Travailleurs agricoles.—Le nombre de travailleurs agricoles engagés, âgés de 15 ans et plus, a été recueilli distinctement pour les travailleurs payés, hommes et femmes, employés durant la semaine terminée le 28 mai 1966.

Toute personne qui fait, à la ferme de recensement, du travail agricole contre salaire, traitement, commission, à la pièce ou en vertu d'un contrat, a été inscrite comme main-d'oeuvre rémunérée. Ce qui comprenait les gérants et les membres de la famille de l'exploitant recevant un salaire régulier ou fixe en argent.

Le travail agricole exécuté par l'exploitant n'était pas inclus sauf si celui-ci était un gérant payé. Dans le cas des fermes de recensement en partie gérées, l'exploitant était considéré comme main-d'oeuvre rémunérée s'il avait travaillé 20 heures ou plus sur la partie gérée.

Les travaux ménagers n'ont pas été inclus dans les travaux agricoles.

Exploitant à temps partiel.—Le recensement de 1966 comptait deux questions ayant trait aux travaux non connexes à l'exploitation de la ferme de recensement:

a) Le revenu retiré par l'exploitant d'un travail non agricole et d'un travail agricole hors de l'exploitation au cours des douze mois précédant le 1er juin 1966, était-il moins de \$750, ou \$750 ou plus?

b) Combien de jours l'exploitant a-t-il travaillé hors de l'exploitation à des travaux agricoles et non agricoles au cours des douze mois précédant le 1er juin 1966?

Si la réponse à la première question indique que l'exploitant a retiré un revenu de \$750 ou plus, d'un travail hors de l'exploitation, il a été classé comme exploitant à temps partiel. Les exploitants de fermes de recensement qui ont retiré moins de \$750 des travaux hors-exploitation, mais qui ont travaillé 75 jours ou plus en dehors de l'exploitation sont aussi classés comme exploitants à temps partiel.

Étaient compris, pour déterminer le revenu hors-exploitation, les traitements, les salaires et commission, ainsi que le revenu net obtenu du travail à façon d'un commerce non agricole ou de l'exercice d'une profession. N'étaient pas inclus les pensions, les allocations familiales, les revenus de placements, les loyers de fermes, l'assurance-chômage et le travail échangé.

Seulement le revenu retiré par l'exploitant pour du travail fait par lui a été considéré pour déterminer s'il était ou non, exploitant à temps partiel. On ne tenait pas compte des revenus retirés par d'autres membres du ménage.

Les données sur les fermes de recensement exploitées par les exploitants à temps partiel, expliquées ci-dessus, sont indiquées dans le tableau 37.

Travail à temps partiel.—Comme il est noté plus haut, l'exploitant de fermes de recensement devait déclarer le nombre de jours de travail agricole et non agricole hors de l'exploitation. Le travail non agricole comprenait des activités comme la pêche, le piégeage, l'abattage, l'extraction minière, les travaux de voirie

work, agency selling, etc. It also included such non-agricultural work as operating a filling station, grocery store or tourist cabins, either on the holding or elsewhere. Agricultural work off the holding such as ploughing, combining, general labour, etc. was only included if it was done either for wages or on a custom basis. Exchange work was excluded as well as work performed by other members of the operator's household.

Selected expenditures. — These expenditures, whether paid in cash or obtained on credit, were reported for each census-farm for the 12-month period, June 1, 1965 to May 31, 1966. If the operator preferred to report the expenditures for the calendar year 1965, rather than for the past 12 months, this was permitted.

Value of agricultural products sold. — Enumerators were instructed to report the value of sales of all agricultural products sold from each census-farm including products traded or exchanged, whether received by the operator or some other person. For tenant-operated farms, the landlord's share of products sold was to be included. Products of an institutional farm used by the institution were considered sold.

Agricultural sales were to be reported for the 12-month period, June 1, 1965 to May 31, 1966. However, if the operator preferred to report the sales for the calendar year 1965, rather than for the past 12 months, this was permitted.

Government payments were to be reported for the particular products for which the payments were being made. A separate question was included for such items as crop insurance and P.F.A.A. payments.

When no sales data were reported, such as in the case of crop failure or census-farms operated for the first time in 1966, an estimate of sales was usually made during the editing phase of the processing based on reported crop and livestock inventories.

Economic classification of census-farms. — The classification of census-farms into economic classes presents a measure of the productive size of the holdings. It should be noted that variations in annual production and prices of agricultural products affect the economic class of individual census-farms. With the exception of "institutional farms, etc." all census-farms are classified as one of eleven economic classes based upon the gross income received from sales of agricultural products.

1. Commercial farms. — Commercial farms were defined as census-farms that reported \$2,500 or more income from the sale of agricultural products. Commercial farms are distributed in eight economic classes, as follows:

1. \$35,000 and over
2. 25,000 - \$34,999
3. 15,000 - 24,999
4. 10,000 - 14,999
5. 7,500 - 9,999
6. 5,000 - 7,499
7. 3,750 - 4,999
8. 2,500 - 3,749

The definition of a "commercial farm" was changed in 1966 from the definition used in 1961. In 1961 a "commercial farm" was defined as a "census-farm" with income of \$1,200 or more from the sale of agricultural products. In this report, adjustments have been made in the 1961 and 1951 Census data to make the statistics comparable to the 1966 definition of "commercial farms".

2. Small scale farms. — Census-farms (excluding "institutional farms, etc.") for which the reported value of agricultural product sales was less than \$2,500 were considered "small scale farms". Statistics for "small scale farms" are reported in three economic classes:

1. \$1,200 - \$2,499
2. 250 - 1,199
3. 50 - 249

et de menuiserie, le camionnage, la construction, le travail dans les manufactures, les bureaux ou les agences de vente, etc. Il comprenait aussi du travail non agricole comme l'exploitation d'une station-service, d'une épicerie ou de cabines de touristes, à l'exploitation ou ailleurs. Le travail agricole hors de l'exploitation, comme le labourage, le battage, les tâches ordinaires, etc., n'était inclus que s'il était fait contre un salaire ou à l'entreprise. Le travail échangé et le travail fait par d'autres membres du ménage n'étaient pas inclus.

Certaines dépenses. — Ces dépenses, comptant ou à crédit, ont été inscrites pour chaque ferme de recensement pour une période de 12 mois allant du 1er juin 1965 au 31 mai 1966. Si l'exploitant désirait déclarer les dépenses de l'année civile 1965 plutôt que celles des 12 derniers mois, il était libre de le faire.

Valeur des produits agricoles vendus. — Les agents recenseurs devaient déclarer la valeur des ventes de tous les produits agricoles vendus de chaque ferme de recensement, y compris les produits échangés, que l'exploitant ou une autre personne ait reçu ces revenus. Dans le cas des fermes louées, la part du propriétaire devait être incluse. Les produits d'une ferme d'institution, consommés par l'institution, étaient considérés comme vendus.

Les ventes agricoles inscrites visaient les 12 mois allant du 1er juin 1965 au 31 mai 1966. Toutefois, si l'exploitant préférait indiquer les ventes de l'année civile 1965, plutôt que celles des 12 mois antérieurs, il pouvait le faire.

Les paiements gouvernementaux devaient être indiqués pour les produits en cause. Une question distincte avait trait aux paiements d'assurances-récolte et d'assistance à l'agriculture des Prairies.

Lorsque les chiffres des ventes n'étaient pas déclarés, comme dans le cas d'une mauvaise récolte ou des fermes de recensement exploitées pour la première fois en 1966, on évaluait ordinairement les ventes lors du contrôle du dépouillement d'après les stocks de produits et de bestiaux.

Classement économique des fermes de recensement. — Le classement des fermes de recensement en catégories économiques donne une mesure de grandeur productive des exploitations. Il est à noter que les variations annuelles de la production et du prix des produits agricoles influent sur la catégorie économique particulière des fermes de recensement. Toutes les fermes de recensement (sauf les "fermes d'institution, etc.") sont classées dans une des onze catégories économiques basées sur le revenu brut des ventes des produits agricoles.

1. Fermes commerciales. — Une "ferme commerciale" se définit comme une "ferme de recensement" dont les ventes de produits agricoles ont atteint \$2,500 ou plus. Les "fermes commerciales" se répartissent entre huit catégories économiques, comme il suit:

1. \$35,000 et plus
2. 25,000 - \$34,999
3. 15,000 - 24,999
4. 10,000 - 14,999
5. 7,500 - 9,999
6. 5,000 - 7,499
7. 3,750 - 4,999
8. 2,500 - 3,749

La définition d'une "ferme commerciale" au recensement de 1966 diffèrait de la définition employée au recensement de 1961. En 1961, une "ferme commerciale" était définie comme une "ferme de recensement" dont les ventes de produits agricoles avaient atteint \$1,200 ou plus. Dans le présent rapport, un ajustement des données des recensements de 1961 et 1951 a été fait afin de rendre les statistiques comparables à la définition de 1966 d'une "ferme commerciale".

2. Petites fermes. — Les fermes de recensement (sauf les "fermes d'institution, etc.") dont les ventes de produits agricoles ont été de moins de \$2,500, étaient considérées comme "petites fermes". Les statistiques pour les "petites fermes" sont réparties en trois catégories économiques:

1. \$1,200 - \$2,499
2. 250 - 1,199
3. 50 - 249

Many of the "small scale farms" are rural residences, holdings of semi-retired people and holdings of part-time operators who had full-time or part-time jobs outside of farming. A substantial proportion of these "small scale farms" would not be regarded as "farms" by many users of statistics since the operators do not rely on agricultural production for a major part of their income.

3. Institutional farms, etc. — Experimental farms, community pastures, Indian reserves and farms operated by institutions, regardless of the amount of sales of agricultural products, were included in this group.

Hutterite colonies were classified as commercial farms and not as institutional farms.

Commercial farm classification by product type. — The commercial farms in the 1966 Census were classified by product type. A comparison with 1951 and 1961 is also presented based on the 1966 definition of a commercial farm (census-farms reporting \$2,500 or more of sales of agricultural products). A 20 per cent sample of the commercial farms reporting was used to determine the numbers of each product type for 1951. All the commercial farms reporting were classified for 1961.

A criterion of 51.0 per cent or more of the total sales was used for the classification. For example, a commercial farm was typed as a poultry farm if 51.0 per cent or more of the total agricultural sales from this holding were obtained from the sale of poultry products. The product types and the items included for each type are shown below.

Under the criteria used, it was possible for a commercial farm to qualify for more than one product type. To prevent this possibility, the types were given a priority rating in the order they are listed below:

1. Dairy. — (a) 51.0 per cent or more of the total sales of agricultural products obtained from dairy products; or

(b) 40.0 to 50.9 per cent of total sales of agricultural products obtained from dairy products, provided that the sale of dairy products together with the sales of cattle and calves amount to 51.0 per cent or more of total sales of agricultural products.

2. Cattle, hogs, sheep (excluding farms qualifying as dairy). — 51.0 per cent or more of total sales of agricultural products obtained from the sale of cattle, hogs and sheep (including wool).

3. Poultry. — 51.0 per cent or more of total sales of agricultural products obtained from the sale of poultry and poultry products.

4. Wheat. — 51.0 per cent or more of total sales of agricultural products obtained from the sale of wheat.

5. Small grains (excluding farms qualifying as wheat). — 51.0 per cent or more of total sales of agricultural products obtained from the sale of all grains (including wheat). Grains include wheat, oats, barley, rye, mixed grains, buckwheat, corn for grain, field peas, field beans, flaxseed, soybeans, sunflowers, rapeseed, mustard seed and safflower.

6. Field crops, other than small grains. — 51.0 per cent or more of total sales of agricultural products obtained from the sale of field crops, other than grains. Crops included are hay and forage crops (including forage crop seed), potatoes, sugar beets, other roots, tobacco and field crops not elsewhere specified.

7. Fruits and vegetables. — 51.0 per cent or more of total sales of agricultural products obtained from the sale of fruits and vegetables (including vegetable seed, but excluding potatoes and turnips).

Plusieurs "petites fermes" sont des domiciles ruraux, des exploitations de personnes pratiquement à la retraite et d'exploitants à temps partiel qui travaillent à plein temps ou à temps partiel hors de l'exploitation. Une proportion importante de ces exploitations de petite envergure ne seraient pas considérées comme "fermes" par plusieurs usagers de statistiques, étant donné que les exploitants ne dépendent pas de leurs exploitations pour la majeure partie de leur revenu.

3. Fermes d'institution, etc. — Les fermes expérimentales, les pâturages en commun, les réserves indiennes et les fermes exploitées par des institutions, indépendamment du montant des ventes de produits agricoles.

Les colonies huttérites se classaient comme fermes commerciales et non comme fermes d'institution.

Classement des fermes commerciales selon le genre du produit. — Au recensement de 1966 les "fermes commerciales" se classaient suivant le genre du produit. On y trouve aussi la comparaison des recensements de 1951 et 1961, basée sur la définition de 1966 d'une ferme commerciale (ferme de recensement dont les ventes de produits agricoles ont atteint \$2,500 ou plus). Un échantillon de 20 p. 100 des fermes commerciales déclarantes a servi à déterminer le nombre de chaque genre de produit pour 1951. En 1961, toutes les fermes commerciales déclarantes ont été classées.

Le critère du classement a été de 51.0 p. 100 ou plus des ventes totales. Par exemple, une ferme commerciale a été classée ferme avicole si la vente de produits avicoles a représenté 51.0 p. 100 ou plus de toutes les ventes de la ferme. Les genres de produits et les détails relatifs à chaque genre sont indiqués ci-dessous.

En vertu du critère ci-dessus mentionné une ferme commerciale pouvait être classée suivant plus d'un genre de produit. Afin d'éviter cet inconvénient, les genres de produits ont été classés dans l'ordre prioritaire indiqué ci-dessous:

1. Produits laitiers. — a) La vente de produits laitiers représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles; ou

b) La vente de produits laitiers représentant de 40.0 à 50.9 p. 100 de toutes les ventes de produits agricoles pourvu que les ventes de produits laitiers, ajoutées à celles de bovins et de veaux, s'élèvent à 51.0 p. 100 ou plus de toutes les ventes de produits agricoles.

2. Bovins, porcs, moutons (sans les fermes classées laitières). — La vente de bovins, de porcs et de moutons (y compris la laine) représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles.

3. Volaille. — La vente de volaille et de produits avicoles représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles.

4. Blé — La vente de blé représentant 51.0 p. 100 de toutes les ventes de produits agricoles.

5. Menus grains (sans les fermes classées à blé). — La vente de menus grains (y compris le blé) représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles. Les céréales comprennent le blé, l'avoine, l'orge, le seigle, les céréales mélangées, le sarrasin, le maïs à grain, les pois et les haricots de grande culture, la graine de lin, le soya, le tournesol, le colza, la moutarde et le carthame.

6. Grandes cultures, autres que menus grains. — La vente de récoltes de grande culture représentant 51.0 p. 100 ou plus des ventes totales de produits agricoles. Les récoltes de grande culture comprennent le foin et les récoltes fourragères (y compris la semence de cultures fourragères), les pommes de terre, les betteraves sucrières, les autres plantes-racines, le tabac, et les grandes cultures non classées ailleurs.

7. Fruits et légumes. — La vente de fruits et légumes (y compris les semences de légumes mais sans les pommes de terre ni les navets) représentant 51.0 p. 100 ou plus des ventes totales de produits agricoles.

8. Forestry. — 51.0 per cent or more of total sales of agricultural products obtained from the sale of forest products. Maple products are not included.

9. Miscellaneous specialty. — 51.0 per cent or more of total sales of agricultural products obtained from any one of the groups of products listed below:

- (a) fur-bearing animals and pelts;
- (b) honey and beeswax;
- (c) maple products;
- (d) nursery and greenhouse products;
- (e) horses;
- (f) other agricultural products such as goats and goat milk.

10. Mixed. — (a) Livestock combination — 51.0 per cent or more of the total sales of agricultural products obtained from the sale of livestock and livestock products. Items included are those included in the specialty groups of dairy; cattle, hogs, sheep; and poultry.

(b) Field crops combination — 51.0 per cent or more of the total sales of agricultural products obtained from the sale of all field crops. Items included are those included in the specialty groups of wheat; small grains; and field crops, other than small grains.

(c) Other combinations — This is a residual group and includes all farms not qualifying for any of the above types.

Supplemental product type — cattle and sheep. — Data for commercial farms of this product type are presented in Table 36 of this report. This product type has been added to the above types in order that a type more dependent on pasture would be available. "Cattle, sheep" farms are defined as commercial farms with 51.0 per cent or more of total sales of agricultural products obtained from the sale of cattle and sheep (including wool).

Data for commercial farms. — In Tables 1, 30 and 36, a limited amount of data are presented by province for commercial farms (farms reporting annual sales of agricultural products of \$2,500 or more). The latter two tables consist of cross-classification data.

A special report which duplicates the detailed data of Tables 13, 14, 17, 18, and 20 to 24 of this volume will be published for commercial farms only. The data in these special tables will be published by county.

Enumeration of Hutterite colonies. — Hutterite colonies were classed as commercial farms in the 1966 Census.

Workers on the Hutterite farms were reported as paid workers even though they receive no wages. In Table 25, which shows the number of hired agricultural workers and the number of hired year-round agricultural workers, the numbers on Hutterite colonies are included in the totals, and are also given in a footnote.

Enumeration of community pastures. — Community pastures were enumerated in the municipality in which the headquarters of the pasture was located. The complete pasture was enumerated on one questionnaire and the tenure of the land was reported as managed. Livestock kept on the community pasture for other farm operators were not to be enumerated on the questionnaire completed for the community pasture. Such livestock were enumerated on the census-farm of the person who owned them.

Community pastures were classed as institutional-type farms.

Census-farm woodlot production. — Data in Tables 9 and 20 include all production derived from "woodlots", private land leased from others for wood cutting, sugar bush, windbreaks

8. Produits forestiers. — La vente de produits forestiers représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles. Les produits de l'érable ne sont pas compris.

9. Spécialités diverses. — La vente de l'un des produits des groupes énumérés ci-dessous représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles:

- a) animaux à fourrure et peaux;
- b) miel et cire d'abeille;
- c) produits de l'érable;
- d) produits de pépinière et de serre;
- e) chevaux;
- f) autres produits agricoles tels que chèvres et lait de chèvres.

10. Ferme diversifiée. — a) Bétail et autres produits — La vente de bétail et de produits du bétail représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles. Sont compris dans ces produits ceux des groupes spécialisés de fermes laitières; de fermes à bovins, à porcs et à moutons; et de fermes avicoles.

b) Combinaison de grandes cultures — La vente de toutes les récoltes de grande culture représentant 51.0 p. 100 ou plus de toutes les ventes de produits agricoles. Sont compris dans ces produits ceux des groupes spécialisés de fermes à blé; à menus grains; et à récoltes de grande culture, autre que les menus grains.

c) Autres combinaisons — Groupe restant qui comprend toutes les fermes qui ne peuvent être classées suivant l'un ou l'autre des types ci-dessus mentionnés.

Genre de produit supplémentaire — bovins et moutons. — Les données sur les fermes commerciales ayant ce genre de produit sont indiquées au tableau 36 du présent rapport. Ce genre de produit a été ajouté aux genres ci-haut mentionnés afin qu'un genre, qui dépend davantage des pâturages, soit disponible. Les fermes commerciales à "bovins et à moutons" sont celles dont les ventes de bovins et de moutons (y compris la laine) représentent 51.0 p. 100 ou plus de toutes les ventes de produits agricoles.

Données relatives aux fermes commerciales. — Les tableaux 1, 30 et 36 contiennent une somme limitée de données, par province, sur les fermes commerciales (soit les fermes qui ont déclaré des recettes de \$2,500 ou plus provenant de la vente de produits agricoles). Les deux derniers tableaux consistent en des données à double entrée.

Un rapport spécial qui reprendra les données détaillées des tableaux 13, 14, 17, 18, et 20 à 24 du présent volume sera publié et traitera uniquement des fermes commerciales. La statistique contenue dans ces tableaux spéciaux sera publiée par comté.

Recensement des colonies huttérîtes. — Les colonies huttérîtes ont été classées avec les fermes commerciales au recensement de 1966.

Les travailleurs dans les fermes huttérîtes ont été inscrits comme travailleurs rémunérés bien qu'ils ne reçoivent aucun salaire. Au tableau 25, qui donne le nombre de travailleurs agricoles engagés et le nombre de travailleurs agricoles engagés à l'année, les nombres relatifs aux colonies huttérîtes sont indiqués dans les totaux et aussi dans les renvois.

Recensement des pâturages en commun. — Les pâturages en commun ont été recensés dans la municipalité où l'administration du pâturage était située. Le pâturage entier était recensé sur un questionnaire et le mode d'occupation de la terre était "gérée". Le bétail gardé dans un pâturage en commun pour d'autres exploitants agricoles ne devait pas être dénombré sur le questionnaire des pâturages en commun. Ce bétail devait être dénombré à la ferme de recensement de la personne qui en était propriétaire.

Les pâturages en commun ont été classés fermes d'institution.

Recensement de la production des terres à bois. — Les données dans les tableaux 9 et 20 comprennent toute production provenant des "terres à bois", de terre privée louée d'autrui pour y couper

and single trees. Not included is production from Crown Lands or from large timber tracts run as a business separate from the agricultural operations and which were leased or under permit solely for cutting of forest products.

Agriculture on non-farm holdings (Form 7).— A separate questionnaire, Form 7, was used in all provinces to report livestock, poultry and greenhouses on holdings which were too small in size or the agricultural production too limited to qualify as census-farms under the census definition. Data for these non-farm holdings are reported in Table 12.

The questionnaire (Form 7) was designed for use by all enumerators, both in urban as well as rural localities. All livestock and poultry on the holding were to be reported, regardless of ownership. The total area of the non-farm holdings was also recorded.

Conversion of arpents to acres.— In some sections of the province of Quebec, the land measure is the "arpent" and enumerators reported land areas in this unit. The conversion to acres was made in the Dominion Bureau of Statistics using the factor "1,000 arpents equal 845 acres".

Availability of unpublished data.— Unpublished data which are too detailed or specialized to include in the regular series of reports may be provided on a cost basis, on request. Charges will be based on either the cost of photographing work tables or the clerical time required to compile the special information. Requests for special tabulations to meet particular needs will be considered to the extent possible in the intercensal period. Tabulations of this type can be very expensive because of the computer programming and computer time involved. There is also the problem of priorities on computer time.

The following are the main types of unpublished material that will be available:

1. Data for census subdivisions (Municipality).— All data which are published by county or census division in this volume (Tables 13 to 26) are available for census subdivisions. A limited amount of data for these small areas are published in Tables 27 to 29 of this report.

2. Cross-classification data for counties or census divisions.— While cross-classification data are published only by province (Tables 30 to 37), these data are also available for counties or census divisions.

3. Frequency distributions.— Distributions of livestock numbers and crop areas are published for province only (Tables 10 and 11), but some work tables by county have been photographed and are available on request. Only the distributions for the more important items in a province have been published, but distributions for other items have been tabulated and are available on request.

4. Commercial farm tabulations.— Tabulations of all census-farms by census subdivision have been re-run for commercial farms. These data will be published by county or census division in a special report, and made available for census subdivisions on request.

Cross-classification tables for commercial farms have been run for province only and are available on request.

5. Tabulations for areas smaller than census subdivisions.— Census of Agriculture data were not tabulated for areas smaller than census subdivisions and are therefore not available. However, the total count of population and the number of households are available for each enumeration area

du bois, des sucreries, des arbres plantés comme brise-vent et d'arbres individuels. Ceci ne comprend pas la production provenant des terres de la Couronne ou les grands boisés exploités comme entreprises indépendantes de la ferme et qui ont été loués ou ont obtenu un permis dans le but de couper des produits forestiers.

Agriculture sur les terres non agricoles (Formule 7).— Un autre questionnaire (Formule 7) a servi dans toutes les provinces à déclarer le bétail, la volaille et les serres, mais comme les exploitations étaient trop petites ou leur production agricole limitée, elles ne pouvaient être classées comme des fermes de recensement conformément à la définition du recensement. Les données sur ces terres non agricoles sont données au tableau 12.

Le questionnaire (Formule 7) a été conçu de façon qu'il puisse servir à tous les agents recenseurs tant dans les localités urbaines que rurales. Tout le bétail et toute la volaille de l'exploitation devaient être déclarés quel qu'en fût le propriétaire. La superficie totale des exploitations non agricoles était aussi déclarée.

Conversion des arpents en acres.— Dans certaines parties de la province de Québec, la mesure agraire est l'"arpent" et l'agent recenseur a inscrit les superficies suivant cette mesure. La conversion en acres a été faite au Bureau fédéral de la statistique, à raison de "1,000 arpents pour 845 acres".

Disponibilité de la statistique non publiée.— Les statistiques qui ne sont pas publiées, trop détaillées ou trop spécialisées pour faire partie des séries régulières de rapports, peuvent être fournies sur demande et contre remise. Les frais dépendront soit du coût de la photographie des tableaux, soit du temps consacré par le personnel à établir les renseignements spéciaux. Les demandes de calculs spéciaux en réponse à des besoins particuliers seront étudiées dans la mesure du possible durant la période intercensale. Les calculs de ce genre peuvent coûter cher à cause de la programmation électronique et du temps consommé. Il existe aussi le problème de la priorité imposée à la calculatrice.

Les principales catégories de renseignements non publiés qu'on pourra ainsi se procurer sont les suivants:

1. Données sur les subdivisions de recensement (Municipalité).— Toutes les données publiées par comté ou division de recensement dans le présent volume (tableaux 13 à 26) sont disponibles pour les subdivisions de recensement. Une quantité limitée de statistiques sur ces petites régions sont publiées aux tableaux 27 à 29 du présent rapport.

2. Classements recoupés des données sur les comtés ou divisions de recensement.— Bien que les données recoupées ne soient publiées que par province (tableaux 30 à 37), elles sont également disponibles pour les comtés ou divisions de recensement.

3. Les distributions de fréquences.— La répartition numérique du bétail et la répartition des superficies cultivées sont publiées par province seulement (tableaux 10 et 11), mais certains tableaux de travail, par comté, ont été photographiés; on peut les obtenir sur demande. Seules les répartitions relatives aux articles les plus importants dans la province ont été publiées, mais les répartitions d'autres articles ont été calculées et l'on peut aussi se les procurer sur demande.

4. Calculs relatifs aux fermes commerciales.— Les calculs relatifs à toutes les fermes de recensement, par subdivision de recensement, ont été repris pour les fermes commerciales. Ils seront publiés par comté ou division de recensement dans un rapport spécial et distribués sur demande par subdivision de recensement.

Le recoupement des tableaux sur les fermes commerciales n'a été fait que par province et peut être obtenu sur demande.

5. Calculs relatifs aux régions moins étendues que la subdivision de recensement.— Les données du recensement de l'agriculture n'ont pas été calculées pour les régions de moindre étendue que les subdivisions de recensement et ne sont donc pas disponibles. Toutefois, on peut se procurer le chiffre total de la

(i.e., the territory covered by an individual enumerator). Certain population characteristics such as age and sex are also available at the enumeration area level for the 1966 Census. Census-farm population figures are not available for areas smaller than census subdivisions.

6. Tabulations for "old" census divisions in Alberta and Manitoba. — A limited amount of data have been tabulated for the Alberta census divisions as they existed in the 1951 Census, and for the Manitoba census divisions as they existed in the 1956 Census.

7. Special type of farm tabulations. — A limited amount of data by a combination of type of farm and economic class was tabulated by province and is available on request. Only commercial farms are included in type of farm tabulations.

population et des ménages par secteur de dénombrement (soit le territoire couvert par un agent recenseur). Certaines caractéristiques de la population telles que l'âge et le sexe sont également disponibles à l'échelon du secteur de dénombrement pour le recensement de 1966. Les chiffres de la population agricole ne sont pas disponibles pour les régions moins étendues que les subdivisions de recensement.

6. Calculs relatifs aux "anciennes" divisions de recensement en Alberta et au Manitoba. — Une somme limitée de données ont été calculées pour les divisions de recensement de l'Alberta telles qu'elles existaient au recensement de 1951, et pour les divisions de recensement du Manitoba telles qu'elles existaient au recensement de 1956.

7. Calculs spéciaux relatifs aux genres de fermes. — Une somme limitée de données ont été calculées suivant le genre et la catégorie économique, par province, et sont disponibles sur demande. Seules les fermes commerciales entrent dans les calculs selon le genre.

1966 AGRICULTURE QUALITY CHECK

The Agriculture Quality Check, by means of a field test, provides a measure of the extent of errors which occurred in the 1966 Census of Agriculture. These errors result from problems inherent in census enumeration, such as, the variation in the quality of enumerators, incomplete enumeration and a lack of comprehension of the data desired on the part of the census-farm operators.

Analysis of results. — Tables 1 to 4 show, for selected characteristics, the Quality Check estimate and the census totals. The estimates of the net error in the 1966 Census statistics, and the sampling error inherent in these estimates are also tabulated. Net error may be simply defined as the difference between the Census and the Quality Check for a given characteristic.

The sampling errors, expressed in both absolute and percentage terms in Tables 1 to 4 are a measure of the precision of the net error estimates. If the net error estimate exceeds twice the sampling error for any item in Tables 1 to 4, then the census totals and Quality Check estimates differ significantly at the 95 per cent level, that is, the census total lies outside the confidence interval. For example, an interval estimate of the number of census-farms that would have been detected, had the Quality Check procedures been applied to the Quebec-Ontario region is $197,794 \pm 2(1,428)$, that is 194,938 to 200,650 census-farms at the 95 per cent confidence level. Hence, the estimated difference of 7,613 census-farms cannot be attributed solely to sampling error for the interval does not include the census total.

From Table 1 it is evident that for most of the items selected, the sample estimate for Canada differs from the census total by an amount which may be attributed to sampling error. Only in the case of the number of census-farms does the census total lie outside the confidence interval. This is also the case for the number of census-farms reported in each of these regions as evidenced by a study of Tables 2, 3, and 4. This apparent under-enumeration in the number of census-farms may be due to differences in the application of the census-farm definition by the Census and Quality Check enumerations. However, the census total for total acres, as shown in Table 3, also lies outside the confidence interval and, in this case, these same definitional problems are not present. Indeed, in seven out of the ten items in Table 3 for which estimates are presented, the census total lies outside the confidence interval. For Table 2, the corresponding figures are five out of eight, and in Table 4, two out of ten.

AGRICULTURE, 1966 — CONTRÔLE QUALITATIF

Le contrôle qualitatif du recensement de l'agriculture permet, au moyen d'un essai sur place, de mesurer l'importance des erreurs survenues lors du recensement de l'agriculture de 1966. Ces erreurs relèvent de problèmes inhérents au dénombrement: par exemple, la variation de la qualité des agents recenseurs, le dénombrement incomplet et le manque de compréhension des renseignements demandés des exploitants des fermes de recensement.

Analyse des résultats. — Les tableaux 1 à 4 indiquent, pour certaines caractéristiques, l'estimation du contrôle qualitatif et les chiffres du recensement. Les estimations de l'erreur nette de la statistique du recensement de 1966 et l'erreur de sondage propre à ces estimations figurent également dans les tableaux. L'erreur nette peut être définie simplement comme la différence entre le recensement et le contrôle qualitatif pour une caractéristique déterminée.

Les erreurs de sondage, exprimées en chiffres absolus et en pourcentage aux tableaux 1 à 4, donnent une idée de la précision des estimations de l'erreur nette. Si l'estimation de l'erreur nette dépasse le double de l'erreur de sondage pour un poste quelconque des tableaux 1 à 4, les chiffres du recensement et les estimations du contrôle qualitatif diffèrent sensiblement au niveau de 95 p. 100, c'est-à-dire que le chiffre du recensement se trouve alors en dehors de l'intervalle de confiance. Par exemple, une estimation d'intervalle du nombre de fermes de recensement qui auraient été dénombrées si l'on avait appliqué les méthodes de contrôle qualitatif à la région Québec-Ontario, est de $197,794 \pm 2(1,428)$, ou de 194,938 à 200,650 fermes de recensement au niveau de confiance de 95 p. 100. La différence estimée de 7,613 fermes de recensement ne peut donc être imputée seulement à l'erreur de sondage puisque l'intervalle ne comprend pas le chiffre du recensement.

Il ressort du tableau 1 que pour la plupart des postes choisis, l'estimation de contrôle pour le Canada diffère du chiffre du recensement d'une quantité qu'on peut attribuer à l'erreur de sondage. C'est seulement quand il s'agit du nombre de fermes de recensement que le chiffre du recensement se trouve en dehors de l'intervalle de confiance. Cela s'applique également au nombre de fermes de recensement déclaré dans chacune de ces régions, comme le fait voir l'étude des tableaux 2, 3 et 4. Ce sous-dénombrement apparent des fermes de recensement peut être attribué à une application différente de la définition d'une ferme de recensement lors du recensement et du contrôle qualitatif. Cependant, le chiffre du recensement indiqué au tableau 3 pour la superficie agricole totale se trouve aussi en dehors de l'intervalle de confiance et pourtant les mêmes problèmes de définition n'existent pas. Effectivement, sur sept des dix postes du tableau 3 pour lesquels figurent des estimations, le chiffre du recensement est en dehors de l'intervalle de confiance. Pour le tableau 2, les chiffres correspondants sont de cinq sur huit, et pour le tableau 4, de deux sur dix.

TABLE 1. Comparison of census totals and agriculture quality check estimates for selected items, 1966, Canada

TABLEAU 1. Comparaison des chiffres du recensement et des estimations du contrôle qualitatif de l'agriculture, certaines caractéristiques, 1966, Canada

| Item — Détail | Unit — Unité | Agriculture quality check estimate — Estimation du contrôle qualitatif de l'agriculture | Census totals — Chiffres du recensement | Net error — Erreur nette | | Sampling error — Erreur de sondage | |

(1) Pour fin de comparaison avec les derniers recensements, ont été éliminés, 1,509 lopins de moins de 1 acre en 1911.

(2) La superficie totale de la terre a été révisée depuis le recensement de 1931.

(3) Comprend la superficie exploitée par le gérant.

(4) Comprend la terre à grande culture, à légumes, à fruits et à pépinières.

(5) Comprend la terre inexploitée.

(6) Comprend les automobiles.

(7) Sur les bâtiments et la terre exploitée par le propriétaire.

(8) Fondé sur un échantillon de 20 p. 100.

(9) Ne comprend pas le loyer des fermes exploitées par les locataires à la part ou les locataires partie à la part et partie en argent.

(10) Pension comprise.

TABLE 3. Census-farms classified by economic class;(1) commercial farms classified by product type,(1) 1951-1966

TABLEAU 3. Fermes de recensement classées selon la catégorie économique(1); fermes commerciales classées selon le genre du produit(1), 1951-1966

TABLE 23. Census-farms — value of agricultural products sold, 1965, (1) by census division

Note: The figures reported in this table were collected primarily for purposes of farm classification but are being published because of their usefulness for studies at the county or census division level. They differ from the cash income figures published by the Agriculture Division, DBS, and the user should exercise caution when using them. See "Introduction".

An X indicates that figures are withheld to avoid disclosing individual operations but these are included in the total.

TABLEAU 23. Fermes de recensement - valeur des produits agricoles vendus, 1965(1), par division de recensement

Nota: Les chiffres de ce tableau ont été réunis surtout pour les besoins du classement des fermes mais ils sont publiés en raison de leur utilité dans les études à l'échelon du comté ou de la division de recensement. Ils diffèrent de ceux du revenu monétaire publiés par la Division de l'agriculture du B.F.S. et l'utilisateur ne devra les utiliser qu'avec réserve. Voir l'"Introduction".

Un X indique que les chiffres sont retenus afin de ne pas divulguer les opérations particulières, mais ils sont compris dans les totaux.

(1) See "Introduction" for explanation of terms.

(2) June 1, 1965 to May 31, 1966.

(3) On buildings and land operated by the owner.

(4) Week ending May 28, 1966.

(5) Census-farm operators reporting income received from agricultural and non-agricultural work off the operator's farm of \$750 or more or who worked 75 days or more off the farm during the past 12 months.

(6) Includes agricultural and non-agricultural work off the operator's farm.

TABLEAU 30. Données sur les fermes de recensement classées selon la catégorie économique(1), 1966 - fin

| Commercial farms — Fermes commerciales | | | Small scale farms — Petites fermes | | | | Institutional farms, etc. — Fermes d'institution, etc. | Unité | Détail | NO |

| Section VIII - POULTRY, JUNE 1, 1966 | | | |
| HENS AND CHICKENS | | | |
| 70. Total chickens (hens, pullets, roosters, chicks, etc., all ages) | Number | | (83) |
| (a) Chicks, under 2 months (include broiler chicks) | | | (84) |
| (b) Pullets, 2 to 6 months, intended for laying | | | (85) |
| (c) Hens and pullets, 6 months and over, kept for laying | | | (86) |
| (d) All other chickens, 2 months old and over, not intended for laying (include broilers and other meat type chickens, roosters, etc., 2 months and over) | | | (87) |
| (The total of Questions (a) to (d) must equal the number given for Question 70.) | | | |
| OTHER POULTRY | | | |
| 71. Turkeys (all ages) | Number | | (88) |
| 72. Geese (all ages) | | | (89) |
| 73. Ducks (all ages) | | | (90) |
| Section IX - SALES OF WHOLE MILK, MAY 1966 | | | |
| 74. Was any whole milk or cream sold from this holding during May 1966? | Yes <input type="checkbox"/> No <input type="checkbox"/> - (If "No" skip to Question 76.) | | (91) |
| 75. Whole milk sold through commercial channels, May 1966 (include milk sold to milk plants, factories, creameries, etc.) | (1) gallons of milk or (2) pounds of milk | | (92) |
| 76. Cream sold through commercial channels, May 1966 (Convert pounds of cream to gallons of cream by dividing by 10.) | (1) gallons of cream or (2) pounds of butterfat | | (93) |
| 77. Whole milk and cream sold directly to consumers, May 1966 (Convert pints of cream to quarts of whole milk by multiplying by 3.) | quarts of milk | | (94) |
| Section X - PART-TIME WORK DURING THE PAST 12 MONTHS | | | |
| 78. What was the income you (the operator) received from non-agricultural and agricultural work off this holding during the past 12 months? (Check one.) (Include salaries, wages and commissions; also include the net income from custom work, non-agricultural business, or professional practice. Do not include pensions, family allowances, investment income, rental of farm or unemployment insurance.) | <input type="checkbox"/> under \$750 <input type="checkbox"/> \$750 or more | | (95) |
| 79. How many days did you (the operator) work off this holding at agricultural and non-agricultural work during the past 12 months? (Do not include exchange work.) | None <input type="checkbox"/> Days | | (96) |
| Section XI - HIRED AGRICULTURAL WORKERS 15 years of age and over - (Do not include housework.) | | | |
| 80. How many hired agricultural workers were employed 20 hours or more during the week ending May 28, 1966? | Number | | (97) |
| (a) Male | | | (98) |
| (b) Female | | | (99) |
| 81. Of the hired agricultural workers reported above, how many were employed on a year round basis? | None <input type="checkbox"/> | | (100) |
| Section XII - SELECTED EXPENDITURES DURING THE PAST 12 MONTHS (Include expenses incurred during the past 12 months, whether already paid or to be paid. Expenses for the calendar year 1965 may be reported, provided this fact is noted in the "Comments" section at the bottom of the page.) | | | |
| 82. Cash wages paid to hired agricultural labour | None <input type="checkbox"/> | \$ /00 | (101) |
| (Do not include amount paid for housework, custom work and construction labour) | | | |
| 83. Taxes | None <input type="checkbox"/> | \$ /00 | (102) |
| (Amount levied on all agricultural property now owned and operated by you whether paid or not. Include municipal and school taxes) | | | |
| 84. Rent (For all agricultural property now operated by you): | None <input type="checkbox"/> | \$ /00 | (103) |
| (a) Cash basis | | | |
| (b) Share or kind basis (report dollar value) | None <input type="checkbox"/> | \$ /00 | (104) |
| Section XIII - VALUE OF AGRICULTURAL PRODUCTS SOLD DURING THE PAST 12 MONTHS (Include landlord's share of products sold. Also report deficiency payments and patronage dividends for the particular products involved.) | | | |
| CROPS SOLD | | | |
| 85. Wheat (spring, durum and winter) | | \$ /00 | (105) |
| (Include Canadian Wheat Board payments received during the past 12 months.) | | | |
| 86. Other grain crops, including oilseeds | | \$ /00 | (106) |
| (Include Canadian Wheat Board payments received during the past 12 months.) | | | |
| 87. Hay and fodder crops, including forage crop seed | | \$ /00 | (107) |
| 88. Potatoes, roots, tobacco, sugar beets and other field crops | | \$ /00 | (108) |
| 89. Other receipts for field crops, such as PFAA payments, acreage payments, crop insurance, etc. | (Name) | \$ /00 | (109) |
| 90. Vegetables and vegetable seeds (Do not include potatoes and turnips) | | \$ /00 | (110) |
| 91. Tree fruits and small fruits (include berries, grapes, and other small cultivated fruits) | | \$ /00 | (111) |
| 92. Greenhouse and nursery products, cut flowers, dry bulbs, and mushrooms | | \$ /00 | (112) |
| LIVESTOCK AND POULTRY SOLD ALIVE OR SLAUGHTERED FOR SALE (If produced under contract, report full sales value.) | | | |
| 93. Cattle (include calves) | Number | \$ /00 | (113) |
| 94. Pigs (include weanlings. Report full sales value for pigs produced under contract) | | \$ /00 | (114) |
| 95. Sheep and lambs (include wool) | | \$ /00 | (115) |
| 96. Horses (all ages) | | \$ /00 | (116) |
| 97. Hens and chickens (include hatchery chicks sold. Report full sales value for broilers produced under contract) | | \$ /00 | (117) |
| 98. Turkeys, ducks, geese and other poultry | (Name) | \$ /00 | (118) |
| OTHER PRODUCTS SOLD | | | |
| 99. Dairy products (include whole milk, cream, butter, cheese, etc.) | | \$ /00 | (119) |
| 100. Eggs (include hatching eggs) | | \$ /00 | (120) |
| 101. Forest products (Do not include maple products) | | \$ /00 | (121) |
| 102. Other agricultural products sold (Honey and beeswax, fur-bearing animals and pelts, maple products, goats, goat's milk, etc.) | (Name) | \$ /00 | (122) |
| Section XIV - FOREST AND MAPLE PRODUCTS (Report only products produced on this holding.) | | | |
| 103. Were any wood products from this holding cut or sold or maple products produced during the past 12 months? | Yes <input type="checkbox"/> No <input type="checkbox"/> - (If "No" omit Questions 104 to 107) | | (123) |
| 104. Fuelwood cut or sold during the past 12 months | | | |
| (a) Quantity of fuelwood cut (Exclude slabs) | None <input type="checkbox"/> | cords - 128 cubic feet | (124) |
| (b) Quantity of fuelwood sold | None <input type="checkbox"/> | cords - 128 cubic feet | (125) |
| (c) Value of fuelwood sold | | (dollars only) | (126) |
| 105. Pulpwood cut during the past 12 months | None <input type="checkbox"/> | cords - 128 cubic feet | (127) |
| 106. Logs cut during the past 12 months (saw, veneer, tie, building logs) | None <input type="checkbox"/> | board feet | (128) |
| 107. Number of toppings of maple trees this spring | None <input type="checkbox"/> | number | (129) |
| COMMENTS | | | |
| ENUMERATOR'S RECORD | | | |
| Did the operator receive an advance copy of the "Agriculture Questionnaire", Form 6? | | | Yes <input type="checkbox"/> No <input type="checkbox"/> |
| If "Yes", did the operator complete any part of the "Agriculture Questionnaire", Form 6? | | | Yes <input type="checkbox"/> No <input type="checkbox"/> |
| Who furnished the information in this report? (Check one.) | | | |
| Operator <input type="checkbox"/> Wife or other member of the operator's family <input type="checkbox"/> Hired worker <input type="checkbox"/> Neighbour <input type="checkbox"/> Other <input type="checkbox"/> | | | |

| BOVINS | | Nombre | À l'usage du bureau |
|---|--------|--|---------------------|
| 62. Nombre total de gros bovins et de veaux Aucun <input type="checkbox"/> | | | (62) |
| a) Veaux de moins de 1 an..... | | | (63) |
| b) Bouvillons de 1 an et plus | | | (70) |
| c) Taureaux de 1 an et plus | | | (71) |
| d) Génisses de 1 an et de moins de 2 | | | (72) |
| e) Vaches et génisses de 2 ans et plus..... | | | (73) |
| (Le total des questions a) à e) doit correspondre au nombre donné à la question 62.) | | | |
| PARMI LES VACHES ET LES GÉNISSES DÉCLARÉES CI-DESSUS, COMBIEN SONT DES: | | | |
| 63. Génisses de 1 an et de moins de 2, élevées principale- | nombre | | (74) |
| ment pour la production laitière?..... | | | |
| 64. Vaches et génisses de 2 ans et plus, en lactation ou | nombre | | (75) |
| devant être traitées?..... | | | |
| PRODUCTION DE LAIT HIER: | | | |
| 65. Combien de vaches et de génisses ont été traitées hier? | nombre | | (76) |
| | livres | | |
| 66. Combien de livres de lait ont été obtenues hier? | | | (77) |
| MOUTONS | | | |
| 67. Nombre total de moutons et d'agneaux Aucun <input type="checkbox"/> | | | (78) |
| a) Agneaux de moins de 1 an..... | | | (79) |
| b) Brebis, bœliers et moutons de 1 an et plus | | | (80) |
| CHEVAUX | | | |
| 68. Nombre de chevaux et de poneys (tous âges) Aucun <input type="checkbox"/> | | | (81) |
| BOVINS À L'ENGRAISSEMENT, 1er JANVIER 1966 | | | |
| 69. Combien de gros bovins et de veaux engraissez-vous au grain et | | Nombre | |
| aux concentrés, le 1er janvier 1966 pour la boucherie? | | | (82) |
| Section VIII - VOLAILLE, 1er JUIN 1966 | | | |
| POULES ET POULETTS | | | |
| 70. Nombre total de poules (poules, poulettes, coqs, | | | (83) |
| poussins, etc., tous âges) Aucun <input type="checkbox"/> | | | |
| a) Poussins de moins de 2 mois (Y compris poussins de grill) | | | (84) |
| b) Poulettes de 2 à 6 mois destinées à la ponte | | | (85) |
| c) Poules et poulettes de 6 mois et plus destinées à la ponte | | | (86) |
| d) Tous autres poulets de 2 mois et plus non destinés à la ponte | | | (87) |
| AUTRE VOLAILLE | | | |
| 71. Dindons (tous âges) Aucun <input type="checkbox"/> | | | (88) |
| 72. Oies (tous âges) Aucune <input type="checkbox"/> | | | (89) |
| 73. Canards (tous âges) Aucun <input type="checkbox"/> | | | (90) |
| Section IX - VENTES DE LAIT ENTIER, MAI 1966 | | | |
| 74. Cette exploitation a-t-elle vendu du lait | | | (91) |
| entier ou de la crème en mai 1966? Oui <input type="checkbox"/> Non <input type="checkbox"/> - Si "Non", passer à la question 78. | | | |
| 75. Lait entier vendu dans le commerce, mai 1966 | | (1) gallons de lait | (92) |
| ou (2) livres de lait | | | |
| 76. Crème vendue dans le commerce, mai 1966 | | (1) gallons de crème | (93) |
| ou (2) livres de gras de | | | |
| beurre | | | (94) |
| 77. Lait entier et crème vendus directement aux consommateurs, mai 1966 | | pintes de lait | (95) |
| Section X - TRAVAIL À TEMPS PARTIEL DURANT LES 12 MOIS ÉCOULÉS | | | |
| 78. Quel a été, durant les 12 mois écoulés, le revenu que vous (l'exploitant) avez | | | (96) |
| retiré d'un travail non agricole et d'un travail agricole hors de cette | | | |
| exploitation? (Marquer une case) | | <input type="checkbox"/> Moins de \$750 | |
| (Sont compris les traitements, salaires et commissions, ainsi que le revenu | | <input type="checkbox"/> \$750 ou plus | |
| net obtenu du travail à façon, d'un commerce non agricole ou de l'exercice | | | |
| d'une profession. Ne pas inclure les pensions, allocations familiales, | | | |
| revenus de placements, loyers de fermes ni assurance-chômage.) | | | |
| 79. Combien de jours avez-vous (l'exploitant) travaillé en dehors | | | (97) |
| de l'exploitation à des travaux agricoles et non agricoles | | | |
| durant les 12 mois écoulés. (Ne pas compter le travail échangé.)..... | | Aucun <input type="checkbox"/> Jours | |
| Section XI - TRAVAILLEURS AGRICOLES ENGAGÉS | | | |
| Âgés de 15 ans et plus - (Ne pas inclure le travail ménager.) | | | |
| 80. Combien de travailleurs agricoles engagés ont été employés | | Nombre | |
| 20 heures ou plus au cours de la semaine terminée le 28 mai 1966? | | | (98) |
| a) Hommes | | Aucun <input type="checkbox"/> | (99) |
| b) Femmes | | Aucune <input type="checkbox"/> | (100) |
| 81. Sur les travailleurs agricoles ci-dessus, | | | |
| combien sont à votre emploi à l'année? | | Aucun <input type="checkbox"/> | (101) |

| Section XII - CERTAINES DÉPENSES DURANT LES 12 MOIS ÉCOULÉS | | Montant | À l'usage du bureau |
|--|---|--|---------------------|
| (Inclure les dépenses, acquittées ou non, encourues durant les 12 mois écoulés. On peut déclarer les dépenses de l'année civile 1965 à condition de le mentionner à la section des "remarques" au bas de la page.) | | (dollars seulement) | |
| 82. Salaires payés en argent à la main-d'œuvre agricole engagée | Aucun <input type="checkbox"/> | \$ /00 | (102) |
| (Ne pas inclure le montant payé pour le travail ménager, le travail sur commande et les travaux de construction.) | | | |
| 83. Taxes | Aucune <input type="checkbox"/> | \$ /00 | (103) |
| (Taxes foncières sur les biens agricoles possédés et exploités, qu'elles soient payées ou non. Inclure les taxes municipales et les taxes scolaires.) | | | |
| 84. Loyer (des biens agricoles que vous exploitez présentement): | | | |
| a) En argent..... | Aucun <input type="checkbox"/> | \$ /00 | (104) |
| b) À la part ou en nature (déclarer la valeur en dollars)..... | Aucun <input type="checkbox"/> | \$ /00 | (105) |
| Section XIII - VALEUR DES PRODUITS AGRICOLES VENDUS DURANT LES 12 MOIS ÉCOULÉS | | | |
| (Inclure la part des produits vendus qui revient au propriétaire et les ristournes. Compter les paiements d'appoint à l'égard des produits en question.) | | Valeur | |
| RÉCOLTES VENDUES | | (dollars seulement) | |
| 85. Blé de printemps, durum et d'hiver (inclure les paiements de la Commission canadienne du blé reçus durant les 12 mois écoulés) | | \$ /00 | (106) |
| 86. Autres céréales, y compris les graines oléagineuses (inclure les paiements de la Commission canadienne du blé reçus durant les 12 mois écoulés.) | | \$ /00 | (107) |
| 87. Foin et fourrages, y compris les graines de plantes fourragères | | \$ /00 | (108) |
| 88. Pommes de terre, plantes-racines, tabac, betteraves à sucre et autres grandes cultures | | \$ /00 | (109) |
| 89. Autres recettes provenant des grandes cultures | | \$ /00 | (110) |
| (telles que les paiements au titre de la L.A.A.P., les versements à l'acre, l'assurance-récoltes, etc.) | | (nom) | |
| 90. Légumes et semences de légumes (sans les pommes de terre ni les navets) | | \$ /00 | (111) |
| 91. Fruits de verger et petits fruits (Y compris baies, raisins et autres petits fruits cultivés) | | \$ /00 | (112) |
| 92. Produits de serre et de pépinière, fleurs à couper, bulbes et champignons | | \$ /00 | (113) |
| BÉTAIL ET VOLAILLE VENDUS VIVANTS OU ABATTUS POUR LA VENTE | | | |
| (Si la production est à forfait, donner la valeur entière des ventes.) | | | |
| 93. Bovins (Y compris les veaux) | Nombre | \$ /00 | (114) |
| 94. Porcs (Y compris les porcs en engraissement. Déclarer la pleine valeur des ventes de porcs produits en vertu d'un contrat) | | \$ /00 | (115) |
| 95. Moutons et agneaux (Y compris la laine) | | \$ /00 | (116) |
| 96. Chevaux (tous âges) | | \$ /00 | (117) |
| 97. Poules et poulets (inclure les poussins de couvoir vendus. Déclarer la pleine valeur des ventes de volailles de grill produites en vertu d'un contrat) | | \$ /00 | (118) |
| 98. Dindons, canards, oies et autre volaille | (nom) | \$ /00 | (119) |
| AUTRES PRODUITS VENDUS | | | |
| 99. Produits laitiers (Y compris lait entier, crème, beurre, fromage, etc.) | | \$ /00 | (120) |
| 100. Oeufs (inclure les oeufs à couver) | | \$ /00 | (121) |
| 101. Produits forestiers (sans les produits de l'érabie) | | \$ /00 | (122) |
| 102. Autres produits agricoles vendus (miel et cire d'abeille, animaux à fourrure et peaux, produits de l'érabie, chèvres, lait de chèvre, etc.) | (nom) | \$ /00 | (123) |
| Section XIV - PRODUITS FORESTIERS ET DE L'ÉRABE | | | |
| (Ne déclarer que les produits de cette exploitation.) | | | |
| 103. A-t-on coupé ou vendu des produits forestiers ou fabriqué des produits de l'érabie dans cette exploitation durant les 12 mois écoulés? | Oui <input type="checkbox"/> Non <input type="checkbox"/> - Si "Non" omettre les questions 104 à 107. | | (124) |
| 104. Bois de chauffage coupé ou vendu durant les 12 mois écoulés | | | |
| a) Quantité de bois de chauffage coupée (sans les "croûtes") | Aucune <input type="checkbox"/> | cordes - 128 pieds cubes | (125) |
| b) Quantité de bois de chauffage vendue | Aucune <input type="checkbox"/> | cordes - 128 pieds cubes | (126) |
| c) Valeur du bois de chauffage vendu | | (dollars seulement) | |
| | | \$ /00 | (127) |
| 105. Bois à pâte coupé durant les 12 mois écoulés | Aucun <input type="checkbox"/> | cordes - 128 pieds cubes | (128) |
| 106. Billes coupées durant les 12 mois écoulés (de sciage, de placage, traverses, billes de construction) | Aucune <input type="checkbox"/> | pièces de planche | (129) |
| 107. Nombre d'érables entaillés ce printemps | Aucun <input type="checkbox"/> | nombre | (130) |
| REMARQUES | | | |
| | | | |
| DOSSIER DE L'AGENT RECENSEUR | | | |
| L'exploitant a-t-il déjà reçu un exemplaire du "Questionnaire agricole", Formule 6? | | Oui <input type="checkbox"/> Non <input type="checkbox"/> | (131) |
| Si "Oui", l'exploitant a-t-il rempli une partie du "Questionnaire agricole", Formule 6? | | Oui <input type="checkbox"/> Non <input type="checkbox"/> | (132) |
| Qui a fourni les renseignements de ce rapport? (Marquer une case) | | | |
| Exploitant <input type="checkbox"/> | Épouse ou autre membre de la famille de l'exploitant <input type="checkbox"/> | Ouvrier engagé <input type="checkbox"/> Voisin <input type="checkbox"/> Autre <input type="checkbox"/> | |

REPORTS OF THE CENSUS OF CANADA, 1966

(Continued from outside back cover)

Volume II—Population (Households and Families)

- 93-601 **Introduction to Volume II (2-1).**—Textual and tabular introductory materials (24 pp., 50c.)
- 93-602 **Dwellings by (a) structural type and (b) tenure (2-2).**—For provinces, counties, centres of 1,000 and over, other municipalities of 10,000 and over, metropolitan and other major urban areas, 1966 (28 pp., 50c.)
- 93-603 **Households by size (2-3).**—For same areas as 93-602 (48 pp., 75c.)
- 93-604 **Household composition (2-4).**—For same areas as 93-602 (40 pp., 75c.)
- 93-605 **Households by type (2-5).**—For same areas as 93-602, except shown for centres of 5,000 and over (40 pp., 75c.)
- 93-606 **Household characteristics by marital status, age and sex of head (2-6).**—For provinces and metropolitan areas, 1966 (96 pp., \$1)
- 93-607 **Household characteristics by structural type and tenure of dwelling (2-7).**—For same areas as 93-606 (52 pp., 75c.)
- 93-608 **Structural type and tenure of dwellings by marital status, age and sex of head (2-8).**—For same areas as 93-606 (32 pp., 50c.)
- 93-609 **Families by size (2-9).**—For same areas as 93-602 (44 pp., 75c.)
- 93-610 **Numbers and ages of children (2-10).**—For same areas as 93-602 (52 pp., 75c.)
- 93-611 **Families by marital status, age and sex of head (2-11).**—For same areas as 93-602, except shown for centres of 5,000 and over (52 pp., 75c.)
- 93-612 **Family characteristics by marital status, age and sex of head (2-12).**—For same areas as 93-606 (84 pp., \$1)
- 93-613 **Families by type (2-13).**—For same areas as 93-602, except shown for centres of 5,000 and over (24 pp., 50c.)
- 93-614 **Household and family relationships of individuals in households (2-14).**—For provinces, 1966 (28 pp., 50c.)

Volume III—Agriculture (Canada Summary and Atlantic Provinces)

- 96-601 **Canada: Summary Tables (3-1)**—(\$1.50)
- 96-602 **Newfoundland (3-2)**—(\$1.50)
- 96-603 **Prince Edward Island (3-3)**—(\$1.50)
- 96-604 **Nova Scotia (3-4)**—(\$1.50)
- 96-605 **New Brunswick (3-5)**—(\$1.50)

Volume IV—Agriculture (Quebec and Ontario)

- 96-606 **Quebec (4-1)**—(\$3.50)
- 96-607 **Ontario (4-2)**—(\$2.50)

Volume V—Agriculture (Western Provinces)

- 96-608 **Manitoba (5-1)**—(\$1.50)
- 96-609 **Saskatchewan (5-2)**—(\$1.50)

- 96-611 **Colombie-Britannique (5-4)**—(\$1.50)

REPORTS OF THE CENSUS OF CANADA, 1966

This report forms part of a series of five volumes of reports on the results of the 1966 Censuses of Population and Agriculture. Individual reports comprising each of the five volumes are summarized below. A catalogue is available listing additional reports in the Special Series, Census Tract Series, etc. For a copy of this catalogue, or for further information on census publications, address your inquiry to the Information Division, Dominion Bureau of Statistics.

Reports in the Volume Series can be ordered singly by catalogue number, or the complete set for any given volume including a titled cover binder, at a composite price of \$8. Orders may be sent to Publications Distribution, Dominion Bureau of Statistics, or to Superintendent of Publications, Department of Public Printing and Stationery, Ottawa. Remittance is required prior to the mailing of reports, by cheque or money order payable to the Receiver General of Canada. Orders are filled as reports become available.

Volume I - Population (General Characteristics)

- 92-601 **Introduction to Volume I (1-1).** - Textual and tabular introductory materials (60 pp., 75c.)
- 92-602 **Electoral districts (1-2).** - Based on 1966 redistribution, by subdivisions, 1966 and 1961 (48 pp., 75c.)
- 92-603 **Counties and subdivisions (1-3).** - By sex, Nfld., P.E.I., N.S., and N.B., 1966 and 1961 totals (12 pp., 25c.)
- 92-604 **Counties and subdivisions (1-4).** - By sex, Que., 1966 and 1961 totals (24 pp., 50c.)
- 92-605 **Counties and subdivisions (1-5).** - By sex, Ont., 1966 and 1961 totals (16 pp., 50c.)
- 92-606 **Census divisions and subdivisions (1-6).** - By sex, Man., Sask., Alta., B.C., Yukon and N.W.T., 1966 and 1961 totals (20 pp., 50c.)
- 92-607 **Incorporated cities, towns and villages (1-7).** - With guide to locations, and including metropolitan and other major urban areas, 1966 and 1961 (36 pp., 75c.)
- 92-608 **Rural and urban distribution (1-8).** - Rural farm, rural non-farm, and urban population by sex, for counties, 1966 and 1961 (28 pp., 50c.)
- 92-609 **Sex ratios (1-9).** - Ratios of males to females, for counties, municipalities of 10,000 and over, metropolitan and other major urban areas, 1966 (16 pp., 50c.)
- 92-610 **Age groups (1-10).** - By sex, for same areas as 92-609 (112 pp., \$1.50)
- 92-611 **Single years of age (1-11).** - By sex, for provinces, metropolitan areas, 1966 (24 pp., 50c.)
- 92-612 **Marital status (1-12).** - By sex, for same areas as 92-609 (60 pp., 75c.)
- 92-613 **Marital status by age and sex (1-13).** - For provinces, cities of 30,000 and over, metropolitan areas, 1966 (48 pp., 75c.)
- 92-614 **Appendix A to Volume I (1-14).** - Populations of unorganized townships in Que., Ont., and Prairie Provinces, 1966 and 1961 (including reference maps) (68 pp., \$1)
- 92-615 **Appendix B to Volume I (1-15).** - Populations of census tracts of 28 major cities, 1966 and 1961 (including index maps) (44 pp., 75c.)
- 92-616 **Appendix C to Volume I (1-16).** - Reference maps of counties and subdivisions, metropolitan and other major urban areas (72 pp., \$1)

RAPPORTS DU RECENSEMENT DU CANADA, 1966

Le présent rapport fait partie de la série de cinq volumes de rapports sur les résultats des recensements de la population et de l'agriculture en 1966. La liste des rapports individuels compris dans chacun des cinq volumes est donnée ci-dessous. On peut se procurer un catalogue qui énumère les rapports additionnels de la Série spéciale, de la Série des secteurs de recensement, etc. Pour en obtenir un exemplaire ou pour tout autre renseignement au sujet des publications du recensement, prière de s'adresser à la Division de l'information, Bureau fédéral de la statistique.

On peut se procurer séparément à l'aide du numéro de catalogue les rapports de la Série des volumes ou bien commander la série complète formant un volume avec auto-relieur titré moyennant un prix global de \$8. On peut adresser sa commande à Distribution des publications, Bureau fédéral de la statistique, ou au Surintendant des publications, Département des impressions et de la papeterie publiques, Ottawa. Les rapports ne seront envoyés que sur réception de la remise nécessaire sous forme de chèque ou mandat établi au nom du Receveur général du Canada. Les commandes seront exécutées aussitôt que les rapports paraîtront.

Volume I - Population (Caractéristiques générales)

- 92-601 **Introduction au volume I (1-1).** - Texte et tableaux d'introduction (60 p., 75c.)
- 92-602 **Circonscriptions électorales (1-2).** - Fondées sur le remaniement de 1966, par subdivision, 1966 et 1961 (48 p., 75c.)
- 92-603 **Comtés et subdivisions (1-3).** - Par sexe, T.-N., Î. P.-É., N.-É. et N.-B., 1966 et chiffres de 1961 (12 p., 25c.)
- 92-604 **Comtés et subdivisions (1-4).** - Par sexe, Qué., 1966 et chiffres de 1961 (24 p., 50c.)
- 92-605 **Comtés et subdivisions (1-5).** - Par sexe, Ont., 1966 et chiffres de 1961 (16 p., 50c.)
- 92-606 **Divisions et subdivisions de recensement (1-6).** - Par sexe, Man., Sask., Alb., C.-B., Yukon et T. N.-O., 1966 et chiffres de 1961 (20 p., 50c.)
- 92-607 **Cités, villes et villages constitués (1-7).** - Avec guide des localités, y compris les zones métropolitaines et les autres grandes agglomérations urbaines, 1966 et 1961 (36 p., 75c.)
- 92-608 **Répartition rurale et urbaine (1-8).** - Population rurale agricole, rurale non agricole, et urbaine par sexe, comtés, 1966 et 1961 (28 p., 50c.)
- 92-609 **Rapports de masculinité (1-9).** - Rapport de l'effectif du sexe masculin à celui du sexe féminin, comtés, municipalités de 10,000 habitants ou plus, zones métropolitaines et autres grandes agglomérations urbaines, 1966 (16 p., 50c.)
